

## LF36

---

The MAMCO/LEFOO water levels switch is a reliable component used in conjunction with a solenoid valve to control the automatic replenishment of water. The LF36 is widely used in washing machines, dish washers, water fountains and other electronic applications.

### LF36 Water Level Switch: Benefits & Features

- It features solenoid valve control to produce reliable, efficient results
- Water level valve can be set to your specifications
- Great for monitoring water replenishment applications

Model	LF36
Media	Air
Basic function	Pressure switch operation: provide water level signals to appliance control, level value can be set on customer request Level 1 (11-12/14) Level 2 (21-22/24) Overflow (21-26)
Electrical data	3mA/24VDC
Humidity	10%-95%
Ambient Temperature	5°C~85°C
Terminal	6.4 x 0.8
Connection	5.5mm OD
Mounting position	Vertical

Conversion: 1mbar=100pa 1" W.C.=249pa
